

Temperature-Controlled Transport

# ABOUT US

Sophia Transport is a temperature-controlled haulier that provides businesses who serve or are linked with the perishable sector in the UK.

Sophia provides transportation for fruits, vegetables, flowers and food items by road, air and sea. This service is integrated with our warehouse and distribution service allowing a fast, efficient and quality service.

# OUR SERVICES

## AIR FREIGHT

Our management have over 30+ years experience collecting and delivering air cargo from around the world. We currently collect daily from Heathrow, Stansted and Gatwick airports as well as East Midlands Airport collecting time sensitive cargo on your behalf.

## DEDICATED TRANSPORT

Our dedicated service allows us to ensure the assignments are completed nationally taking into account any delays. We deliver nationwide and are trusted for known packers and growers in the United Kingdom.

## FREIGHT FORWARDING

Internal freight forwarding service is available to compliment our logistics services. Clearing goods through Customs allows better planning, allowing your produce to reach its final destination faster and efficiently at the correct temperatures.

## LONDON WHOLESALE MARKETS

We are a trusted transporter with extensive experience in the deliveries of fresh produce for businesses who supply the London Wholesale Markets. We run a daily service to New Spitalfields Market, Western International Market and New Covent Garden Market. These can be booked under a groupage service or a dedicated vehicle. We collect locally so whoever handles your distribution - know that your delivery is in safe hands with Sophia.

## STORAGE & DISTRIBUTION

Our new facility which is dedicated solely for fresh produce is now operational. We can create orders for collections and deliveries whilst storing stock or arranging a cross docking service.

# PERISHABLE FACILITY

Based near Heathrow, Sophia Transport has excellent transport links with the M4 and M25 Motorway near by. With excellent links in and around London.

Our new facility is 6000 sqf solely dedicated to perishable cargo. Breakdown of cargo, order making, re-packing and cross docking all within our own facility.

This new facility is specifically designed to cater for temperature controlled perishables.

Speak to us on any of the services below:

- Custom Clearance
- Air Freight Collection
- Distribution
- Delivery + Collections of distributed produce
- Temperature Analysis
- Dedicated Deliveries
- Cross Docking

# OUR FLEET

Our vehicles are all temperature controlled and are fitted with roller-bed equipment to transport with ease PMC units and AKE units. These units are then transported for breakdown and distribution.

Vehicles are fitted with live temperature tracking systems, with live feeds. Allowing you to know the exact temperature of your goods while in transit, storage and distribution. All vehicles are GPS tracked as standard.

Integrated IT systems to allow easy POD synchronising and communication between our front line team and the office monitoring assignments.

Transport Solutions For Perishable Cargo:

- Sea Container  
Felixstowe, Southampton and London Gateway
- Air Cargo Trailers fitted with roller-bed system for import and export
- By Road across the United Kingdom

Sometimes it happens, things can go wrong. Have peace of mind that we have got you covered. Our Goods in Transit cover protects you against any errors arising.

Different loads, different sized vehicles - rest assured we will send your cargo with the most cost effective vehicle - operating vans, rigids and trailers.
